## GET STARTED WITH JUSTINMIND

### SIGN IN TO JUSTINMIND

Once your order is complete, a Justinmind account will be created with the user details provided at purchase.

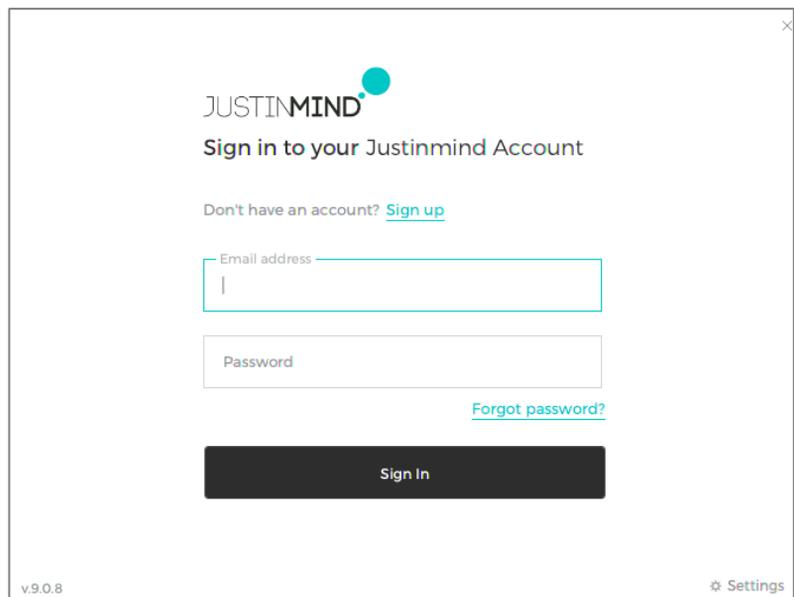

Those will be the account owner details and login credentials.

Verify your account with the link in your order confirmation email. \*Skip this step if you upgraded from a trial account.

If you haven't done so already, install the Justinmind desktop editor.

The first time you launch Justinmind, a window will pop up for you to sign in.

Enter your Justinmind credentials, and that's it! You're all set up to start prototyping.

The screenshot shows a 'Sign in to your Justinmind Account' dialog box. At the top is the Justinmind logo. Below it is the title 'Sign in to your Justinmind Account'. A link 'Don't have an account? Sign up' is provided. There are two input fields: 'Email address' and 'Password'. A 'Forgot password?' link is located below the password field. A dark 'Sign In' button is at the bottom center. The version 'v.9.0.8' is in the bottom left, and a 'Settings' link with a gear icon is in the bottom right.

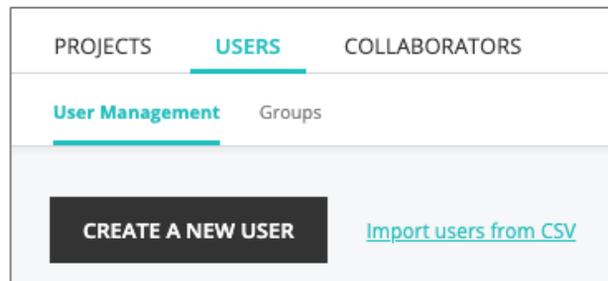

## MULTI-USER ACCOUNTS

### ADDING USERS TO A MULTI-USER ACCOUNT

Once the Justinmind account is set up, the account owner will be able to invite any additional users following the next steps.

1. Sign in to the 'Users' section of your online account:

<https://www.justinmind.com/usernote/listUsersAndGroups.action>

2. Select 'Create a new user'

3. Fill out user information and select 'Create user'.

\*Repeat for each user or add user by uploading a csv file as explained here:

<https://www.justinmind.com/support/how-to-import-account-users-from-a-csv-file/>
